

Task Sheet 2

The purpose of this activity is multifaceted. Primarily, it serves as a practical exercise to apply and demonstrate HTML and CSS skills in web development. By creating a multi-page website with specific styling and content requirements, participants can practice structuring web pages, applying different fonts, sizes, and colors, and incorporating images and hyperlinks.

Additionally, this activity helps reinforce understanding of web design principles, such as layout, typography, and navigation. Participants learn how to organize content effectively, ensure visual consistency across pages, and provide clear navigation options for users.

Moreover, this activity simulates a real-world scenario where individuals may need to create a personal website to showcase their academic, professional, and personal information. It provides an opportunity for self-expression and reflection, allowing individuals to present themselves in a digital format for various purposes, such as job applications, personal branding, or networking.

Overall, the purpose of this activity is to enhance web development skills, reinforce design principles, and create a personal website that effectively communicates information about the individual in a visually appealing and user-friendly manner.
